## Review Form 1.6

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>In this paper, 3 cases of pediatric patients are included. In Abstract, this is expressed as "There were 3 Pediatric patients aged 7, 10 and 18 months", but it is judged that there is an error in the indication of age. Correction is required.</p> <p>Keywords are words suggested by "MeSH on Demand" and need to be corrected.</p> <p>In the Introduction, the reference following the sentence "The resulting fractures ~ in the human body, after blood" needs to be modified.</p> <p>In the text of the Results, it is a total of 13 patients. The following sentence states 10 female and 2 males. Correction is required.</p> <p>In Table 2, the sum of the items "Site of implant" is only 10. Correction is required. In the discussion, references following "This is similar to a study done by Haseeb et al [2017]" need to be revised. Correction is required.</p> <p>References need to be modified according to the reference style provided by this journal.</p>	
<b>Minor</b> REVISION comments	<p>Rarely, refractures are experienced after implant removal. If you have experienced any complications related to implant removal, including refracture, please describe them in the discussion section.</p>	
<b>Optional/General</b> comments	<p>Please refer to the following papers. 1) Beate Hanson, Chris van der Werken and Dirk Stengel. "Surgeons' beliefs and perceptions about removal of orthopaedic implants", BMC musculoskeletal disorders, 2008, 9:73. 2) Dagmar Vos, Beate Hansen and Michiel Verhofstad. "Implant removal of osteosynthesis : the Dutch practice. Results of a survey", Journal of Trauma management &amp; outcomes, 2012 : 6:6</p>	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
