PART 1: Review Comments

	Reviewer’s comment	Author’s comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	There is no need for compulsory revision, given the vivid and detailed description of prognosis, diagnosis and treatment of the described medical condition, which is neonatal meningitis, thus the paper should be accepted for publication.	
<u>Minor</u> REVISION comments	The author should add a good number of case studies scenarios, so as to make the paper relevant to studies in medical settings, this is a minor revision, nevertheless the paper should be published.	
<u>Optional/General</u> comments	The paper captured in detail,, though descriptively, the epidemiology and pathogenesis of neonatal meningitis, also it robustness scientifically pedagogically, warrant that it should be published.	

PART 2:

	Reviewer’s comment	Author’s comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
