PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and
		highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		white his/her reedback here)
Compulsory INE VIOLON Comments		
Minor REVISION comments		
	The paper proposed by the authors is relevant and in line with a sustainable forest management	
	of the Congo Basin forests. The paper is well written and documented, and the results are	
	properly discussed. However, some minor corrections are required:	
	The authors should read the author guideline of the journal (Author	
	guidelinehttps://www.journalajraf.com/index.php/AJRAF/about/submissions	
) for a correct presentation of the paper (Police, double space of the main and sub titles of	
	the text, tables and figures)	
	A surprising fact is the lack of mean±SD and the significant differences (p-values)	
	between the results obtained (Table 3 in particular) although the authors claimed using a	
	Statistic software and a large number of NTFPs to calculate the % contribution to	
	household income. Giving the significance between some contribution to collectors' household income which seem very close should help to discriminate properly the	
	results.	
	Introduction	
	Lines 40 and 44: Harmonize the reference according the author guideline "(Tieguhong	
	and Ndoye, 2006)…" "Duguma <mark>&</mark> Mesele, 2019"	
	Materials and Methods	
	Location of Study area	
	Line 90-91: I suggest the authors to give the GPS data of the "Two villages were then	
	selected in each sub-division based on their access to markets (easy and difficult)."	
	Line 92: More details should be given for the map of Figure 1 as the same map was found	
	in Google image.
