PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	• The scientific name in the main title should be mentioned with its author citation (L.) as these are minor details that impart deep impression on the researchers, readers, and especially a taxonomist.	
Minor REVISION comments	**-----**	
Optional/General comments	• Although the manuscript defines well-descriptive details about the anatomy of plant species. You can also add the response of anatomical structures to the polluted areas to enhance the authenticity of your work. As the previous studies have reported the increase or decrease in the leaf size (anatomy) in response to pollution, etc. This minor suggestion I am adding just because you have aimed to study the descriptive anatomy of the plant for its survival and colonization in harsh conditions, being a weed. • If you have already studied in your anatomical research, the measurements (in micrometer, millimetre, etc.) of leaf, stem and root to can also be mentioned to define the anatomical features in more elaborated manner.
