PART 1: Review Comments

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<div>1. Sentences to be modified are highlighted in yellow colour as they carry no meaning or needs grammatical corrections.</div> <div>2. Spelling mistakes and annotations and spacing of words to be rechecked. Some modified in red colour fonts</div> <div>3. In the text it was mentioned as nonadherence- whether it is nonadherence or poor adherence? Forgetting the dose cannot be mentioned as nonadherence. Poor adherence may be good word. In these subjects of poor adherence one child missed the doses due to poor palatability. Has he/ she totally not taking the drugs or then and there missing – If totally refused to take the drugs can be called nonadherence.</div> <div>4. Article is longer, many things repeated. As the facts mentioned in results, in tables and discussions – then there is no need for separate summary which is nothing but a repetition.</div> <div>5. In the materials and method there is no need to explain elaborately about the nucleic acid extraction of viral RNA and RT PCR amplification as it has not significant in this article.</div> <div>6. Viral copies can be modified as viral load</div> <div>7. Certain references in the text lacking the reference numbers</div> <div>8. In Conclusion, it can be mentioned about the ways and means of improving the adherence also.</div>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments
