### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	1.The title should be modified slightly to reflect focus of this study vis-à-vis cholecystitis 2. Was this a prospective or retrospective study? 3. If prospective, the methodology was grossly inadequate. The inclusion and exclusion criteria were not clearly spelt out. 3. What was the criteria for diagnosis of cholecystitis in these patients? 4. Did any of the patient have cholelithiasis? 5. In the Patients and methods section there was no statement about gall bladder wall thickness being measured. Yet the conclusion was largely all about wall thickness. 6. Was the study about factors predicting conversion to open cholecystectomy of which wall thickness may just have been one factor	
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments
