Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The information given into the manuscript is good and informative scientifically. However, there are some suggestions/corrections to do in order to make the paper more attractive and informative.	
Minor REVISION comments	<div>❖ Introduction</div> <div>➤ Write it with four paragraph in maximum;</div> <div>➤ Avoid unnecessarily long paragraphs. Break up your paragraphs into smaller, useful units;</div> <div>➤ The 1st paragraph should contain the general background of the topic;</div> <div>➤ The 2nd and 3rd paragraphs should discuss previous works related to the topic;</div> <div>➤ The last paragraph should Point out issues that are being addressed about the problem and the purpose of the present work.</div> <div>❖ Materials &amp; Methods</div> <div>➤ Add a data analysis section in the last paragraph with subheadings</div> <div>❖ Results</div> <div>➤ Make sure your graphs and tables can speak for themselves;</div> <div>➤ The Results section should contain only results, no discussion;</div> <div>➤ You should organize this section with subheading and do not repeat in words everything that your tables and graphs convey. You can, however, point out key findings and offer some text that complements the findings;</div> <div>➤ Do not forget to number your figures and tables. You should indicate them into the brief interpretation related to them (two sentences in maximum).</div> <div>❖ Discussion</div> <div>➤ Make sure that your discussion is concise and informative. Do not ramble and include a great deal of unnecessary information that will likely get your paper rejected or at least be looked upon less favorably;</div> <div>➤ The order of figures should follow the discussion themes and not the sequence they were conducted;</div> <div>➤ Your discussion section should answer why you obtained the observed results and also why your results are important. Do not simply restate the results. Highlight how your research contributes to the current knowledge in the field and mention the next steps or what remains. Feel free to explain why your results falsify current theories if that is the case;</div> <div>➤ Discuss how your data compare with previous results and do not forget to indicate their references with number into the text;</div> <div>➤ If possible add the limitations of your study in the last paragraph with a subheading.</div>	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
