

Review Form 1.6

Journal Name:	Asian Research Journal of Mathematics
Manuscript Number:	Ms_ARJOM_84102
Title of the Manuscript:	EVEN METRIC SPACE
Type of the Article	Short Research Article

General guideline for Peer Review process:

This journal’s peer review policy states that **NO** manuscript should be rejected only on the basis of ‘**lack of Novelty**’, provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalarjom.com/index.php/ARJOM/editorial-policy>)

PART 1: Review Comments

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	No	
Minor REVISION comments	No	
Optional/General comments	To be precise, we need to assume the metric space (M,d) in Definitions 1.2 and 2.1 to be more specified ones such as a "normed vector space". The reason is as follows: • In Definition 1.2, the author uses the notations x+a and y+a. But how can we add two elements of a set M? In fact, if M is a normed vector space, we can add two elements. • In Definition 2.1, the author uses the notation -y. But what is -y of an element $y \in M$? In fact, if M is a normed vector space, we can consider -y of an element $y \in M$. • In Proposition 2.3, the author writes “zero”. But what is zero of a set M? In fact, if M is a normed vector space, then zero is an element of M.	

PART 2:

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
