

Review Form 1.6

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	Ms_CJAST_84293
Title of the Manuscript:	EVALUATION OF SOIL WETTING PATTERNS IN CLAY LOAM SOIL UNDER DRIP IRRIGATION
Type of the Article	Short Research Article

General guideline for Peer Review process:

This journal’s peer review policy states that **NO** manuscript should be rejected only on the basis of ‘**lack of Novelty**’, provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalcjast.com/index.php/CJAST/editorial-policy>)

PART 1: Review Comments

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Given that the outcome of this study is overall more research needs to be done, this section should be much more specific as far as fieldwork tests, modelling scenarios and irrigation techniques that would support the next round of studies. The conclusion and recommendations section is just a general discussion of the fieldwork, modelling and irrigation research that can be done.</p> <p>More of a discussion can exist with respect to the overall standing benefits of less water use with the employed method regardless of the ambiguous data on soil wetting.</p>	
Minor REVISION comments		
Optional/General comments	<p>Topic is important... Thank you for your research efforts!</p>	

Review Form 1.6

PART 2:

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
