

Review Form 1.6

Journal Name:	International STD Research & Reviews
Manuscript Number:	Ms_I-SRR_85309
Title of the Manuscript:	The role of gender and religion as determinants of condom use among university students; a quantitative survey
Type of the Article	

General guideline for Peer Review process:

This journal’s peer review policy states that **NO** manuscript should be rejected only on the basis of ‘**lack of Novelty**’, provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journali-srr.com/index.php/I-SRR/editorial-policy>)

PART 1: Review Comments

	Reviewer’s comment	Author’s comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	In the Conclusion/Recommendation section, the author states: “Government and relevant stakeholders reevaluate policies sexual and reproductive health education, and implement measures which seek to discourage sexual activities among the youth so as to serve as a barrier to prevent the transmission of STDs and sexually transmitted diseases which are at a peak currently” This sentence is too long and needs to be re-worded and made clear. Are you saying that gov SHOULD reevaluate policies?	
<u>Optional/General</u> comments	Overall a good, strong paper. Current studies on condom use are very limited, so this is a much needed update of the topic, especially after many years of condom promotion for HIV and SRH.	

PART 2:

	Reviewer’s comment	Author’s comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
