

Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	MS_IJBCRR_84242
Title of the Manuscript:	In silico studies of phytochemicals from Aframomum melegueta leaves against Acetylcholinesterase, Butyrylcholinesterase and Glycogen Synthase Kinase-3 beta as anti-Alzheimer's disease target.
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://journalijbcr.com/index.php/IJBCRR/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Interesting work. There are some little details that need to be corrected: Reduce the extension of title; include in the methodology the description of properties of molecule anti-AD used as control; change some word by others in all de text, etc. The observations are included as attention calls on the right margin of the text	
Optional/General comments	The manuscript is an important contribution to the knowledge in the field of drugs design but also as bridge between the scientific and traditional knowledge of medicinal plants and its properties. Made the corrections, I recommend its publication	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
