PART 1: Review Comments

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>This research was undertaken almost a decade ago.Hence are the results still valid?What more with the changing climate and weather, soil fertility, and etc must have changed.</p> <p>I do not see Statistic Analysis under Materials and Methods, so how to know what method and softwares were used.This is a major drawback</p> <p>References used are not only too little, but absolutely no citation of high impact journals.thus discussion seems very shallow</p> <p>In M&M, there is one particular para whereby every sentence starts with “during the two years”,author need to brush up on grammar.</p> <p>I don’t see discussion on interaction effect</p> <p>Also no mention on watering pattern/irrigation system</p> <p>Is the research conducted on rice field or screen house?</p> <p>Some data on physiological parameters will be excellent</p>	
Minor REVISION comments	<p>when writing on fertilizer application,got to mention method and time of application. eg: in three equal splits at basal, 30 DAT (days after transplanting) and at 60 DAT(this is not right).</p>	
Optional/General comments	<p>Check for uniformity is the use of dry matter,drum seeder, lowland is one word improve on grammar</p>	

Comment [U1]: pls ensure you mention all application in terms of time of application.basal is not time,it is method of application
