### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	If still possible, it is recommended that the control treatment be the landrace without FPP, as planting a hybrid without support is not as common. For this research it is necessary to make a benefit/cost analysis that justifies the financial investment.	
<b>Minor</b> REVISION comments	The justification of the investigation should be more precise according to what was done in this investigation, since it talks about the causes of the producers and it was investigated in the technological packages to increase the production of sorghum. Clarify if the forage yield is dry or fresh? Place the level of statistical difference in the resulting mean values of the measured variables: a, b, c, d, etc.	
<b>Optional/General</b> comments	The research has adequate scientific value to be published.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
