	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>The work is good but the general presentation needs refinement.</p> <p>In my opinion there is not a very significant effect of K on seeds per boll at various secondary and micronutrient combinations.</p> <p>All the table headings need rewriting. The tables' headings should be neutral i.e., without inferences. The reader withdraws the conclusions from the table data and as explained by the author in the text.</p> <p>A lot of scholarly articles are cited in literature on BT cotton. More references should be incorporated e.g., Doi: <a href="https://doi.org/10.23910/2/2020.0364">HTTPS://DOI.ORG/10.23910/2/2020.0364</a> Muhammad Aslam et al., International Journal of Research in Agriculture and Forestry V7 • I3 • 2020</p>	
<b>Minor</b> REVISION comments	The highlighted words need attention.	
<b>Optional/General</b> comments	<p>The paper must add more references. It will be good if conclusion is given in a few sentences.</p> <p>The paper must be revised in light of comments given on the paper.</p>
