### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The "Introduction" should have some more text. One paragraph usually isn't enough for publication. The first time you use an abbreviation, spell out what the abbreviation stands for. Check the manuscript template and format the document according to it. The spacing and paragraph structure are inconsistent throughout the paper. I would switch to a different font as well.	
<b>Minor</b> REVISION comments	Grammar usage needs to be checked and remedied.	
<b>Optional/General</b> comments	The detail on the statistical analysis used was outstanding. This researcher evidently used these tools to create an effective manuscript.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
