### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	Table 3, Confusion Matrix, certainly is confusing. 50 results seem to be missing. Only 75 in Non-Rice category instead of 125. So can't trust the accuracy figures.	
<b><u>Minor</u></b> REVISION comments	The Type I and Type II errors should be noted using those terms.  Good Accuracy? Meaningless statement. 8-10% error could mean difference between, say profit and bankruptcy. Better to compare accuracy to that of older, non-satellite-based techniques.	
<b><u>Optional/General</u></b> comments	Nice work.	

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
