PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The article is of important because it contributes to a poorly elucidated question: The fundamental of the ways of applying Zinc in plants. And Zn deficiency is recognized as a worldwide nutritional problem. I consider the article very good but I woul like my suggestions to be mandatory for raising your technical level. Thus, I place a score 9.5 the objective evaluation (Part 4), but with this reservation.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
