<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	<p>In this work, the combined application of organic and inorganic fertilizer has resulted in the higher nitrogen, phosphorus and potassium when compared to the sole application. Micronutrients like iron, copper, manganese and boron except zinc were found to be higher in the rhizosphere soil.</p> <p>This article is well-written and built on a strong foundation. By incorporating interesting subtopics, the authors were able to successfully respond to the study's main question. Previous references provided sufficient evidence to back up their findings and interpretations. As a result, I am willing to accept this manuscript as is. As a reviewer, I declare that I have no competing interests.</p>
