

Review Form 1.6

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_87894
Title of the Manuscript:	“Response of different pre-sowing seed treatments with Biofertilizers, Biostimulants and Botanicals on growth, yield and yield attributing traits in chickpea (<i>Cicer arietinum</i> L.) var. desi himmat”
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijpss.com/index.php/IJPSS/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none">- In the manuscript I made some observations to improve the work.- In the MATERIAL AND METHOD section, the experimental design must be indicated, thus defining the treatments, repetitions, statistical analysis developed and the variables evaluated. In addition, it is important to report: the size of the plots, microbial load of the <i>Rhizobium</i> inoculant, <i>Rhizobium</i> species, measurement techniques of the variables evaluated, fundamental characteristics of the biostimulants, biofertilizers and plant extracts used.- Make appointments according to the rules.	
Minor REVISION comments	<ul style="list-style-type: none">- Check the spacing between words.	
Optional/General comments	<ul style="list-style-type: none">- It is important to indicate the characteristics of the soil, especially the nitrogen content of the soil, because they are conditions that directly influence the variables evaluated. In addition, that the conditions of high availability of soil nitrates are inhibitory for the biological fixation of atmospheric nitrogen.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
