PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The main drawbacks of this manuscript. 1- The purpose of the research is not documented in the summary. 2- The introduction is insufficient and the innovation of this study is not mentioned. 3- Failure to provide valid references in the introduction 4 - Materials and methods need a general review because no information on planting conditions, sampling, or measurement is provided. 5- In the results and discussion section, only low or high is mentioned. It is also consistent with the research of others ... There is no scientific reason for the author himself to think about the use of nitrogen. 6- The tables are presented at the end of the manuscript after the references (contrary to the principles of writing). 7. There are many grammatical flaws in the text of the manuscript.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
