

Review Form 1.6

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_89635
Title of the Manuscript:	A COMPARATIVE STUDY ON GROWTH FLOWERING AND CORM PRODUCTION THROUGH BY GROWTH REGULATORS & CUT CORMS OF GLADIOLUS (Gladiolus grandiflorus L.)
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**' provided the manuscript is scientifically robust and technically sound.

Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write
<u>Compulsory</u> REVISION comments	The manuscript presents important information of propagation methods of <i>Gladiolus grandifloras</i> using varied corms and concentrations of plant regulator GA3. However serious major revisions should be made by the authors before being accepted in this journal. My suggestions for each part of the manuscript are as follows: 1. Title: please revise the title, since it does not represent manuscript content. 2. Abstract: please rewrite Abstract. It should contain research background, research aim, methods, results, and conclusion. 3. Keywords: Please rewrite. Keyword. It is about five words, covering scientific and local name (if any), research theme, and special methods which used; and sorted from A to Z. 4. Introduction: Please rewrite Introduction. It should cover the background and aims of the research. Please add previous study on <i>Gladiolus</i> spp., mainly <i>Gladiolus grandiflorus</i> . Please mention the reason why did you study <i>G. grandiflorus</i> , but not another species? The last paragraph should contain summary of research problem or how important this current research was conducted and research aim. 5. Materials and Methods: I recommend presenting Materials and Methods in subtitles. Please add references cited. Please mention source of <i>Gladiolus</i> corm. How many individuals per treatment were observed? 6. Results and Discussion: Please revise Tables 1 and 2. Present and explain your results first, then make appropriate discussion. Discussion represents the causal effect, mainly explains why and how the results of the research were taken place. Please make a deeper discussion by comparing your results to previous studies and make appropriate interpretation. 7. Conclusion: Please rewrite and confirm to research aim. 8. Acknowledgments: please add. 9. References: Please follow Guidance for Authors and add the latest references (at least last 5 years) to improve manuscript quality. Make sure all references are cited in the text and vice versa.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	The authors should rewrite whole parts of this manuscript. All comments are presented in the manuscript.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u>
