PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript subject is exciting, but the authors didn't present it in a good way, In my opinion, this work needs major revisions. My individual comments are listed below. -The writing is too poor and Authors should check the spelling. Several phrases and words throughout the text need editing. pls revise it. -In the introduction part should be more highlighted the main aim of the paper -The "Conclusion" section should be enlarged by including specific results and conclusions drawn from them, not only the general conclusion of the manuscript.	
<u>Minor</u> REVISION comments	-Keywords number must be between 5-6 words. - Results of study have not been compared with the findings of earlier scientists. -it's important to test phosphorus and potassium? -The author didn't follow union in writing style whether the units used or the style of writing of references - Replace the references of older years with the reference of latest years.	
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
