### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	The article entitled "Effects of Consumption of Campus Buka Diets on Some Health indicators of apparently Healthy Students of Abia State University Uturu" reported the consequences of student diet on blood counts. The results as expressed as mean value $\pm$ SD demonstrated a major reduction in blood cell counts. The results should be presented as initial values and 3 months values in percentiles. To further try to understand the cause of cytopenia, the MCHC and the MCV of RBC should be reported. Iron deficiency or vitamin deficiency have different consequences on RBC parameters, whatever a combined deficiency may complicate the conclusion. It will be of interest to know if a part of the group has Hb congenital abnormalities.	
<b><u>Minor</u></b> REVISION comments	Minor: Reference 10 neutropenia instead of neutripenia. It will be useful to define what it is the Buka diet by a foot note.	
<b><u>Optional/General</u></b> comments
