### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	The case is well documented and written in clear and objective language.  I suggest including some important information for the reader.	
<b><u>Minor</u></b> REVISION comments	In the discussion, I suggest putting data on the prevalence of the complication in the population, as well as document other studies that also used a non-surgical approach in the treatment of this condition.  Still in the discussion, include limitations and positive points of the study.  In the concluding section of the study, reinforce the importance of a non-surgical approach in the treatment of the documented clinical condition.	
<b><u>Optional/General</u></b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
