Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>1. For a better understanding, I suggest to organize the manuscript in five parts: Introduction; Materials and Methods; Results; Discussion and Conclusion.</p> <p>2. I suggest rewriting the last paragraph in the introduction to better clarify the purpose of the study.</p> <p>3. In manuscript (section Materials and methods). To identify articles that talk about climate change in the incidence of Malaria from the uncontrolled reproduction of the propagation vector <i>A. darlingi</i>, searches, included articles published from what year? I suggest to specify the period of the study</p> <p>4. Remarks: in manuscript (section Keywords) Plasmodium should be: <i>Plasmodium</i></p> <p>5. Please, check also the species names.</p>	
<u>Minor</u> REVISION comments	<p>6. In manuscript (section <i>Malaria Incidence</i>) Why present only 2018 and 2019 data on malaria incidence in Brazil? I think it would be better to introduce the data on the climate of Brazil at each of these periods in order to observe the possible variations</p> <p>7. In manuscript (Table 2 and Table 3) Why present 2017 and 2018 data here when malaria incidence section presented 2018 and 2019 data?</p> <p>8. In manuscript (Table 2 and Table 3) I do not agree with the calculation of the differences that you have expressed as a percentage. Explain how you proceeded to get these data.</p> <p>9. I suggest that you detail your calculation methods in the material and method section</p>	
<u>Optional/General</u> comments	<p>10. Please, check also the punctuation.</p>
