Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>Epidemiological Characteristics of Cases Of COVID-19 Reinfection and Recurrence In Rivers State, Nigeria</p> <p>Many thanks for the opportunity to review this paper. There is a gap for this issue, especially in Africa on the one hand, with little publications with a whole lot of purpose. The case series described a technically sound piece of scientific research with data that supports the conclusions. It has been conducted rigorously, with appropriate controls, replication, and sample sizes. The conclusions are also drawn appropriately based on the data presented. They presented in an intelligible fashion and written in Standard English. However, the following minor issues needs the authors attention</p> <p>1.Why you are interesting to conduct this research? 2. What special approach did you use to increase the quality this paper? 3. What special characters or features or components did you include in this study? 4. Since you assess the Epidemiological Characteristics Of Cases Of COVID-19 Reinfection and Recurrence In Rivers State, Nigeria.. what special measures did you take to reduce the limitation associated with socially desirable bias? 5. Discussion: well, expressed, however, it will be good if you include the clinical implication of the finding in Ethiopia in general and in the study area in particular? 6. please correct the grammatical error in whole of the manuscript?</p>	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
