Manuscript Number:	Ms_IRJGH_85726
Title of the Manuscript:	Colorectal Cancer Screening: Insights From a National Survey of Patients and Healthcare Providers
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://journalirjgh.com/index.php/IRJGH/editorial-policy> )

### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	No	
<b><u>Minor</u></b> REVISION comments	In discussion maybe need to speak more if there was any relation between family history of CRC and choosing colonoscopy as method of screening either for physicians or patients. As this factor is very important to decide which method of screening you need to use and recommend.  Also, it is may be worth knowing if these patients and physicians had any symptoms (constipation, bleeding per rectum, weight loss, etc) which affected their choice of screening methods?	
<b><u>Optional/General</u></b> comments	1- I suggest to add the current guidelines and recommendations of CRC screening with sensitivity of each test. 2- I think patients younger than 50 years old with strong family history should be included in such study.	

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
