PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The manuscript entitled Enhancing Cucurbita pepo Growth, Productivity, and fruit quality using Bacilli strains and Cyanobacteria treatments. It is a very important original work in the field of soil agronomy and biotechnology. however, it will be important to improve the writing of the manuscript in order to increase its quality. Authors should consider that when discussing the results of the work, they should focus on a discussion that deepens the extraction of information, without sticking to simple comparisons with works by other authors. To discuss means to look closely at the results and understand what these nodes say.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
