

## Review Form 1.6

Journal Name:	<a href="#">Journal of Applied Life Sciences International</a>
Manuscript Number:	Ms_JALSI_84115
Title of the Manuscript:	EVALUATION OF TOXIC EFFECTS OF SELECTED PRODUCTION CHEMICALS ON THE NIGER DELTA FRESH WATER TILAPIA GUINEENSIS
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljalsi.com/index.php/JALSI/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments		
<b><u>Minor</u></b> REVISION comments	<p>EVALUATION OF TOXIC EFFECTS OF SELECTED PRODUCTION CHEMICALS ON THE NIGER DELTA FRESH WATER TILAPIA GUINEENSIS</p> <p>EVALUATION OF SELECTED CHEMICALS USED IN THE PRODUCTION OF OIL AND GAS IN NIGER DELTA AND THEIR TOXIC EFFECTS ON FRESH WATER TILAPIA FISH GUINEENSIS.</p> <p><b>ABSTRACT</b></p> <p>The energy need of the world is expected to keep increasing in the years to come, while mono-economies like that of Nigeria that depends on the revenues from oil and gas production to thrive will continually search for more oil fields to explore and produce from.(Recast). However, there are numerous environmental concerns associated with oil and gas activities, especially with respect to management of the wastes generated during the oil and gas activities. One of the concerns is the environmental issues associated with produced water arising from completion and production operations (Recast).</p> <p>SPECTRUS NX1173 (Biocide), FLOGARD MS 6208 (Corrosion inhibitor), ELIMINOX (Oxygen scavenger) and EC9017A (anti-foam), (Trade name expantiate on the chemical constituents)</p> <p>The comments in green colours are my humble suggestion while red inks means/not a standard method/recast/ expunge or remove from the manuscript. See attached manuscript for detail.</p>	
<b><u>Optional/General</u></b> comments	Also, the author can generate another manuscript from the topic, by find out the chemical composition of these each chemical (because the trade name was given) with GC-MS correlate the each component with one and other to know the one that p>0.05
