Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	1. Topic need to be revised: A study to determine the incidence and prevalence's of Traumatic Head Injuries in Zanzibar. Case study of Mnazi Mmoja Hospital. 2. Use the word client instead of patient because the study deal with out-patients and not inpatient. 3. What are the study objectives? The analysis was supposed to target the objectives. 4. Study population should include the total number of client participant that were recruited for the study duly represented with capital letter 'N' and the sample size were supposed to be drawn out of the population following a sample size calculation formular. Represent the ideal sample size with small letter 'n'. this need to reflect the this study . 5. The results were supposed to be objective driven and it will be easy to comprehend with addition of graphical representation. 6. The tittle of table 3 need to be charge to reflect the exact message such as Prevalences of THI according to classification.	
Minor REVISION comments	1. Your use of the word "outcome, predictive and burden is not clear. Are you talking In terms of outcome of the management or what? 2. Was analyzing the prevalence's of THI part of the objective? If no, why do you include report on the prevalence in this study? 3. The aim mentioned in the introductory part of the abstract was not included in the introduction of the main manuscript which is (this study is aimed at assessing the burden and predictive factors of Traumatic head injury at Mnazi Mmoja Hospital, Zanzibar). The result and discussion doesn't not address or show the burden and as	

	you have read it in several articles including the study done in 6 hospitals in Tanzania that road accident crash is the leading cause of THI. That nullify your prediction because by research it has already been established. So your aim need to be changed.	
Optional/General comments	1. This manuscript need extensive syntax and grammatical corrections (Work closely with English tutor for appropriate rewording) 2. Use a uniform font letters 3. Avoid using personal statement such as 'OUR, MY, WE' etc. Rather use a generic word like 'THE study .... 4. Avoid repetition or tautology 5. This study lack clarity, what are the objectives, rationale, inclusion and exclusion criterial and most importantly the hypothesis that guide this work? All these were supposed to be captured in your introduction as part of the foundation that the study was drawn on.
