PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	In the methods section: the interviewed women were 735 while mentioned in the results they were 759 The included women age was 15-49 although in the result the range is up to 63 Please revise Were the women who are not married (divorced single,...) asked about the use of contraceptives? If yes, it should be declared as inclusion criteria The use of contraceptives before and after the outbreak should be expressed in absolute numbers and a statistical relation is recommended More analytical aspects are recommended as the study is rich in information but data interpretation is weak to some extent	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
