### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	This manuscript is interesting. I have a few comments for the Authors. -In abstract, methodology, there are too much details relative to PET CT acquisition; this informations, in the abstract session, should be restricted. -introduction, first line, is reported: BCa (BCa). This should be changed in Breast Carcinoma (BCa). -Also, in introduction, should be reported the full name of the radiotracer <sup>18</sup> F-FES: <sup>18</sup> F-fluoroestradiol ( <sup>18</sup> F-FES). -Results and discussion: in the figures 1, 2 and 3 the 18F-FES uptake seems intense; it is not clear how the SUVmax reported for the lesions is very low (SUVmax: 1, 4 and 2.2).	
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments
