Manuscript Number:	Ms_JAMMR_85306
Title of the Manuscript:	The Impact of Age on Malaria Prevalence Among COVID-19 Patients And Healthy Volunteers With Some Associated Symptoms In Rivers State, Nigeria
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljammr.com/index.php/JAMMR/editorial-policy> )

### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	It is a cross-sectional study of 300 vs 300. Acceptable spectrum for study population.  However, I personally think that the study does lack of novelty: it doesn't add anything new to the existing literature. Plus, the difference found between Covid po and neg group and between the 3 age group did not offer any insight or enough explanation.	
<b>Minor</b> REVISION comments	Author should clarify inclusion and exclusion criteria: -inclusion: all signs/symptoms has to be present or only one of them is enough -exclusion: other infection or other febrile conditions? Please be precise by stating them.	
<b>Optional/General</b> comments	It was well written and presented, with a good flow and acceptable methodology.	

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
