### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments	1 It is difficult to know the objective of this study from the title, not clear whether it intends to explain the delayed impact of Covid-19 disease itself or the confinement strategy? Or both? 2)it is not known which qualitative method the authors used? 3) the findings and recommendations should appear on the abstract 4) The type of questionnaire shall be described. is it fully standardized or adapted by the authors? How many "yes" or how many "no" replies are to be regarded as having a mental impact? 5) where is the result coming from mobile interaction? We are only seeing the questionnaire results.	
<b><u>Minor</u></b> REVISION comments	1)the figure needs description and it shall be placed in the results section 2) in the body of this paper, the word "mental impacts" is repeatedly used instead of "psychological impacts" which s available at the very title. It is better to look words seriously. 3)What statistical analysis is made? Marely frequency? 4) follow a similar style for all references, do not mix 5) do not use informal abbreviations	
<b><u>Optional/General</u></b> comments	The paper has a serious wording problem. Better to use correct and simple words as well keep the paragraphs that I arranged.
