PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. Very long paragraphs and are sometimes difficult to understand.2. The importance of the work should be highlighted. Put the most relevant results and support them with references.3. Review the citations in the text and that it corresponds with the references.4. It is noted that it is a cut and paste of other works (wikipedia).5. Review the text very well since when changing the font format the symbol format has been lost, example: □- interferon	
Minor REVISION comments	<ol style="list-style-type: none">1.- Change "&" to "and"2.- There are 2 types of fonts in the text.3.- Reference 5 is from the autor Kamsali Hema and not from the author Peddoju Moulika.4.- In Discussion, put the % percent better than n(%). It's easier to read that way. example: "Oseltamivir was the most widely used antiviral, which was administered to 51.6% patients"5.- The table 1 Table 1 can be gender vs age. It would give us much more information.	
Optional/General comments	It is good research, but better results can be obtained if the results obtained are better expressed. Congratulations.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
