PART 1: Review Comments

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<div>1. An interesting study.</div> <div>2. Just wanted to ask the authors how the molecular subtype (Luminal A vs B) was defined</div> <div>3. The proportion of BRCA mutations in this study is very high. I wonder whether this reflects the general African population in general?</div> <div>4. Age appears to have a significant effect on the survival. Is BRCA more frequent among those who were less than 50 years?</div> <div>5. Is there any information on the types of treatments received? Given that all women were from the same unit, I would assume that the treatments received were similar? How are they compared to standard guidelines and how compliant were the women to these treatments? I think this would make a significant contribution to survival.</div>	
Minor REVISION comments		
Optional/General comments		

Review Form 1.6

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
