### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments		
<b><u>Minor</u></b> REVISION comments	This is a timely and comprehensive review about the basic information of soot and its healthy relevance. I have the following minor comments. (1) Since the content in this review is not restricted in cancer, I suggest the author to change a different title. (2) Tables or figures are needed for (at least) section 2.0 and 6.0. (3) I suggest the author to combine section 4.0 and 6.0 together. There is no need to use a separate section to introduce carcinogen. You need to make this part concise. (4) There is a redundant “,” in the sentence “two seasons (rainy and dry seasons) revealed that 6 metals; Cromium, Manganese,”.	
<b><u>Optional/General</u></b> comments
