

Review Form 1.6

Journal Name:	Journal of Experimental Agriculture International
Manuscript Number:	Ms_JEAI_84983
Title of the Manuscript:	Sesame (Sesamum indicum L.) Response to Combinations of Ethalfluralin Plus S-Metolachlor Applied Prior to Planting
Type of the Article	Short Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljeai.com/index.php/JEAI/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	No specific comments	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	Sesame is a small-seeded crop lacking the emergence vigor of crops such as grain sorghum [<i>Sorghum bicolor</i> (L.) Moench] or cotton (<i>Gossypium hirsutum</i> L.) and requires a well-prepared seed bed with seeds placed in soil moisture . It is very susceptible to both drought and water-logging since it is slow in establishment. Since the seed of sesame is small, shallow planting is needed for successful establishment. With weak seedling vigor, limited competitive ability, and a lack of inexpensive and affordable labor, the use of preemergence (PRE) and/or postemergence (POST) herbicides are essential for commercial mechanized sesame production, especially in the U. S. Author had well formulated the research programme and presented the data more scientifically. Article is highly recommended for publication in the journal.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
