Review Form 1.6

Journal Name:	**Journal of Engineering Research and Reports**
Manuscript Number:	**Ms_JERR_88060**
Title of the Manuscript:	**Fuzzy equalization strategy based on multilayer circuits**
Type of the Article	**Original Research Article**

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty'**, provided the manuscript is scientifically robust and technically sound.

PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	• Substantially, the abstract is quite good but has not adopted the research objectives	
Minor REVISION comments	• Please explain the meaning of the sentence "the fuzzy equalization technique suggested in this work is able to confine the operational current ***of the band you eat*** within the normal range, making the equalization process safer. • In the abstract section, it has been stated that "In comparison to a multilayer equalization circuit without an equalization strategy, the fuzzy equalization technique suggested in this work is able to confine the operational current of the band you eat within the normal range, making the equalization process safer. Therefore, it is also necessary to be stated in part 3 and reviewed in the results, this is important to strengthen validation. • In section 4 SIMULATION RESULTS AND DISCUSSION "Matlab is used to create the simulation platform in this paper", therefore it needs to be included in the literature.	
Optional/General comments	Overall, this paper is good enough but needs some improvement as suggested above	

PART 2:

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Are there ethical issues in this manuscript?	*(If yes, Kindly please write down the ethical issues here in details)*
