PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<ul style="list-style-type: none">- In results section, page 3, the author wrote "Group HDE had significantly higher SOD than the control". However in Table 1, LDE had higher SOD than HDE (94.5 VS. 93.8). Check.- Photomicrographs of the liver specimens is neither clear nor understandable. Moreover more explanation is needed.- Page 6, the first paragraph, what did the author mean by "The results of other antioxidants such as catalase, super oxide dismutase and malondialdehyde(MDA) whose activities were assessed in this study were similar to that of the GPx." ? Did he consider MDA as antioxidant?- The references should be written in a uniform manner based on the journal's instructions.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
