

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_71045
Title of the Manuscript:	COVID-19: SOURCE, SYMPTOMS, SCREENING, PREVENTION AND TREATMENT
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://peerreviewcentral.com/page/manuscript-withdrawal-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Review the treatment options. The authors defend chloroquine as a possible treatment option. At this point on the pandemic, we have a significant number of randomized clinical trials, I would focus on those and debate the results based on their data. Always remember, as scientists we fit our beliefs to the data and not the other way around.	
Minor REVISION comments	This article would benefit of English proofing, especially regarding style.	
Optional/General comments	Has potential but the treatment part has outdated and outright wrong information and needs to be updated and reviewed before further consideration	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
