PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Study objective, methodology, statistical methods and results analysis was fine. The number of Rh negative pregnancies among 'O' blood group mothers not mentioned in manuscript. It would be better to consider Rh incompatibility also which is a confounding factor for the pathological jaundice or you should exclude the Rh negative pregnancies to avoid confounding. There is more more than 50% matching on plagiarism including title, study place, sample size, results and statistical numbers	
Minor REVISION comments	Minor spelling mistakes and few incomplete sentences are present.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
