Compulsory REVISION comments		
Minor REVISION comments	<p>Thank you for asking my opinion about the manuscript entitled "ADHERENCE OF INSULIN THERAPY IN DIABETIC MELLITUS PATIENTS IN A TERTIARY CARE HOSPITAL" This manuscript aims to evaluate Metformin hydrochloride (MH) floating dosage form by In vitro evaluation/In vivo prediction. I believe that this manuscript should be major revision:</p> <p>The aim of this study (Page 1- Abstract) was there to evaluate the adherence of Insulin therapy among diabetic patients. To identify the factors leading to poor adherence to Insulin therapy among diabetic patients. There were several good things about the paper, such as aim good. But the abstract should be reformulated and the objective of the study should be well highlighted.</p> <p>1. The abstract is untidy and needs to be paraphrasing. 2. The introduction is very short? 2.1. In the introduction, include the significance of the study as well as novelty. What makes the study different from the rest and what does it add to the current knowledge? 2.1. In the introduction, the authors should have explained the purpose of this study and the existing gaps in this field and explain why this study was conducted. 3. References are relevant, correct, and not recent. The number of references should be increased. 4. There are a lot of grammatical errors. This must be taken care of and addressed.</p>
