PART 1: Review Comments

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>This is a short communication that study the adherence of insulin therapy in T2DM patients in a tertiary care hospital. The results are interesting and are agree with the most of the studies related. I suggest that the population studied be indicated.</p> <p>It would be interesting report if sociodemographic conditions influence adherence, that is, to carry out an extra analysis to determine if men or women adhere to treatment more easily, as well as if living in the city or residing in some other place can influence.</p> <p>The authors do not declare any competing interest.</p>	
<u>Minor</u> REVISION comments	<p>I suggest doing a grammar review and homogenizing the article in its entirety, due to the fact that several errors are observed.</p>	
<u>Optional/General</u> comments
