PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|--|---|
| <u>Compulsory</u> REVISION comments | <p>There are multiple problems with this manuscript. First, the grammar is very poor and the text itself needs to be edited for proper grammar and punctuation. As far as the clinical description, it's half hazard, out of chronological order, provides dates that make no sense and does not clearly describe the medical history of the patient. For example, the paper states that the patient has not had passed stool since birth, then goes on to describe that the patient has been passing stool daily with the use of enema. It is unclear why the patient was brought into to hospital at the age of 2, when the patient apparently had no symptoms and a normal physical exam.</p> <p>This paper must be rewritten and presented in the proper format of medical history, physical findings, medical and surgical treatment and outcome. It needs to be written with proper grammar and spell checked prior to submission for editorial review</p> | |
| <u>Minor</u> REVISION comments | Major revisions need | |
| <u>Optional/General</u> comments | See first paragraph | |

PART 2:
