PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	No revision	
Minor REVISION comments	No Revision	
Optional/General comments	The study conducted on three hundred & ninety respondents consistently reveals the significant association between the positive views of the health care providers and the other study subjects with the p-values lesser than 0.001. The study concludes that other socio-demographic fabric of the community showed varied effect on COVID 19 vaccine uptake intentions and hesitancy. The study should be published as is a good scientific read	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
