PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	It is clear that toxoplasma gondii is associated with a number of cases of schizophrenia but not all of them. The author should better ascertain the pattern. It is clear by reading the manuscript that it has been approached.	
Minor REVISION comments	Suggested grammatical improvement. Besides I think that the author has to read the concept of the meat-pollution cycle presented in https://escipub.com/Articles/IJTCM/IJTCM-2021-01-2306.pdf Toxoplasma contamination certainly may be enough in a few cases to replace alpha emitting nanoparticulates entirely. But not a lot. The conclusions of the author are too ambitious.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
