Manuscript Number:	Ms_JPRI_78503
Title of the Manuscript:	Transforming growth factor beta as salivary biomarker in periodontitis patients with or without diabetes mellitus
Type of the Article	Original article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalipri.com/index.php/JPRI/editorial-policy>)

### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ul style="list-style-type: none"><li>• The topic is well addressed in literature and this study lack originality.</li><li>• It is very hard a single marker can represent the complex nature of periodontal disease and diabetes, thus further biomarkers have to be added.</li><li>• Sample size is very small for across sectional study.</li><li>• The clinical data is missing in the result.</li><li>• The introduction does not lead to the aim of the study</li></ul>	
<b>Minor</b> REVISION comments	Language is very weak, need proofread.  Style of writing is not easy to read.	
<b>Optional/General</b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
