PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>The questionnaire adopted was not validated before utilizing it in pilot study. The originals authors of questionnaire adopted in this study were acknowledged. Also, I thought the author will have a cardiopulmonary Physiotherapist as a co-author because, telerehabilitation and other physical activities are core skills of a Physiotherapist. Referring to Physiotherapist as other healthcare professionals is not pleasant.</p> <p>Table 3 ,4 and 6 not stratified into each health professionals, so the tables appear clumsy and not explanatory enough.</p> <p>However, this is good research and publishable if the above suggestions are considered.</p>	
<u>Minor</u> REVISION comments	<p>This can be quantitative research? Version of SPSS used not stated.</p>	
<u>Optional/General</u> comments	<p>The objectives were addressed considering the conclusion of this study.</p>	

Review Form 1.6
