PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript is not an Original Research Article; it can be a review article. As it has too much guidelines and review of literatures. The article developed a questionnaire, without any application.... the author(s) Should have been tested the questionnaire on a sample of many people to come up with solid results and conclusion. As the article highlights the efficacy of "Ayurveda " which is an ancient tradition, used in India. This ancient concept should be carefully evaluated in the light of modern medical science and can be utilized for the benefit of human being worldwide. Therefore, I suggest editing the manuscript accordingly. Some further comments were listed in the manuscript.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
